### ***Drawings***

The drawings are objected to as failing to comply with 37 CFR 1.84(p)(4) because reference character "3" has been used to designate both motor shaft and oil pump. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 8, 12, 13, 16 and 17 are rejected under 35 U.S.C. 102(b) as being anticipated by Takeshi et al., (EP 1049234 A2). Takeshi et al., disclose a drive unit 10 for an electric vehicle comprising a motor M, an inverter H, a speed reducer (see column 8, lines 37-40), a first refrigerant (water) receiving heat of at least one of the motor and the inverter and outputting the heat into the atmosphere through radiator R; second refrigerant (lubricating oil) receiving heat of at least one of motor and the speed reducer and outputting heat to the first refrigerant through a heat exchanger C; the heat exchanger C transferring the heat of second refrigerant to the first refrigerant. See Fig.1, column 6, line 44 to column 9, line 2. Also see Fig. 6,11, 12 and 14.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3744

Claims 2-7, 9-11, 14-5 and 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Takeshi et al. Takeshi et al., disclose the invention substantially as claimed except the specific configuration of inverter and speed reducer, it is an obvious to have a specific configuration of the above objects since there is no criticality or unexpected result from it.
